If yes, please identify and/or describe the material: Submitting agency letters (dated 6-5-89 and 6-6-89)

Results of Review

File #: 95-288462 Item or Specimen # Reviewed: Q1, Q10-Q13, Q18-Q30, K1, K2, K7, K8

Review of Laboratory Report(s) and Bench Notes:

Note: Numbered comments are required below or on additional pages for any "No" or "Unable to Determine" Responses

- 1) Did the examiner perform the appropriate tests in a scientifically acceptable manner, based on the methods, protocols, and analytic techniques available at the time of the original examination(s)?
 Yes No Unable to Determine
- 2) Are the examination results set forth in the laboratory report(s) supported and adequately documented in the bench notes?
 Yes No Unable to Determine

Review of Testimony:

Note: Numbered comments are required below or on additional pages for any "No" or "Unable to Determine" Responses

- Transcript not available.
- 3) Testimony consistent with the laboratory report(s)? Yes No Unable to Determine
 - 4) Testimony consistent with the bench notes? Yes No Unable to Determine
 - 5) Testimony within bounds of examiner's expertise? Yes No Unable to Determine

Comments

102

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 95-288462

#1: With microscopic hair comparison, even with the best notes, there is no way to determine the comparison was performed correctly.

#2: The examination results set forth in the laboratory report are supported by the bench notes, but the documentation is marginally adequate. The notes are not dated or initialed and are in pencil. The technician's notes do not indicate that any hair was recovered from the Q items. RQ uses abbreviations to indicate the microscopic characteristics of the hair. These abbreviations are difficult to interpret.

The laboratory report contains results of hair comparisons performed on multiple cases (90608077, 90608078, 90608079, 90608080, 90608081, 90608082, 90608084, 90608085, 90608086, 90608087). There is no

Review completed at: 2:15 PM (Time), 03/13/2001 (Date)

Total time spent conducting review (to nearest 1/4 hour): 1:15 hours

I hereby certify that I conducted this review in an independent, unbiased manner and that the results of my review are fully documented on this report consisting of a total of 4 pages.

#2 (continued): documentation of the hair comparisons in these cases within this case file.

All hair matches were apparently verified by a second hair examiner.

#5: Malone testified that the head hair and the pubic hair transfer are two independent events. While this is true, he goes on to state that, in his opinion, the chances that the head and the pubic hair came from someone else besides the defendant is "almost non-existent". While the finding of head and pubic hair matching head and pubic hair of one individual increases the likelihood those hair came from that individual, hair comparisons remain associative evidence that "do not constitute a basis for absolute personal identification", as stated in his laboratory report. Malone has overstated the significance of the hair comparison.

He also testified that, in his opinion, the defendant was almost certainly in the residence where the hair samples were collected. Malone is going beyond the scope of hair comparison and is making a conclusion that should be left for the jury to decide.

The defendant represented himself at trial.
